

NEW! All in One dvLED Solution

Sharp is here to help introduce your customers to direct view LED solutions - **with their new AIO models that can be installed in under 2 hours without certification!**

Basic Specs of the AIO dvLED Solution:

Providing customers with an easy to install, user friendly LED wall complete with all of the features and functionality expected from a SoC product.

-138" and 165" size options (Models: LD-A1381F & LD-A1651F)

Essential Features for Customer Benefits

- Easy Installation: Installation can be completed in as little as 2 hours by anyone. No certification or special training required.
- User Friendly: Familiar features to our existing LFD product line. Remote control and speaker functionality the same as the MExx2 series LFD line.
 - Supports UI and command control equivalent to ME series
 - Equipped with sufficient connection terminals for use as a conference monitor (HDMI x3, USB-C)
 - Large capacity speakers: (18W + 18W)
 - Built in Wi-Fi allows wireless screen sharing
 - High end integrated media player
- Robust SoC Functionality: NaViSet Administrator, Crestron Connection, Eshare
- Impactful Imaging: Seamless bezel-less image, with the higher contrast and brightness expected from dvLED
- Support for third party applications
